PROFESSIONAL SUMMARY

Results-driven Full-Stack .NET Developer with a proven track record of designing and delivering scalable financial and enterprise applications across Africa and Europe. Over 5 years of hands-on experience building secure, high-performance software using C#, .NET, SQL Server, React, and Azure.

I specialize in backend architecture, API integrations, and cloud-ready systems — blending technical depth with real-world business awareness. My experience in the financial technology sector has honed my ability to develop reliable, compliant, and efficient solutions under tight timelines.

CORE COMPETENCIES

- Languages & Frameworks: C#, .NET 6+, ASP.NET Core, Entity Framework, React, JavaScript, TypeScript
- Databases: SQL Server, PostgreSQL, Redis
- Cloud & DevOps: Microsoft Azure, Docker, Dapr, SignalR, CI/CD (GitHub Actions, Azure DevOps)
- Architecture: RESTful APIs, Microservices, Event-driven systems
- Other Skills: Problem-solving, cross-border collaboration, agile methodology, mentorship

PROFESSIONAL EXPERIENCE

Software Engineer | Process Crafting Expert Services (PCES)

Ghana & Macedonia | Jan 2022 – Present

- Led backend and integration development for multinational financial platforms, powering real-time transaction and cashbox workflows.
- Built and optimized .NET APIs and SQL stored procedures to process high-volume financial data with accuracy and speed.
- Integrated solutions with third-party fintech systems for account management, debit/credit processing, and reporting.
- Designed multi-step state-managed web applications with React and Tailwind CSS, ensuring persistence and intuitive UX.
- Implemented SignalR-based real-time notifications and event updates across distributed systems.

- Contributed to global projects spanning multiple time zones, driving cross-border development efficiency by 25%.

Junior Software Engineer Intern | Turntabl Ghana

Accra, Ghana | Sep 2021 – Jan 2022

- Developed and maintained backend modules using Java, Spring Boot, and Redis, enhancing trading system reliability.
- Authored JUnit tests improving system test coverage and deployment stability.
- Participated in agile sprints and code reviews, ensuring clean, maintainable codebases.

Graduate Intern | WACCBIP (University of Ghana)

Legon, Ghana | Sep 2020 – Aug 2020

- Designed Python algorithms to analyze genomic data, showcasing cross-domain adaptability.
- Supported IT systems administration, ensuring uptime and data security for research workflows.

SELECTED PROJECTS

- In-House Accounting System – Developed and maintained a comprehensive accounting system handling transactions, balance reconciliation, and audit trails for internal financial operations.
- Telegram Chatbot Application – Designed and deployed a secure Telegram chatbot for financial institutions, enabling automated customer interactions, account inquiries, and payment processing.
- USSD Applications – Built and optimized multiple USSD applications for banking services, supporting real-time balance checks, fund transfers, and transaction notifications.
- WhatsApp Chatbot Applications – Developed WhatsApp-based financial chatbots integrating with core banking systems for account management, balance checks, and service requests.

EDUCATION

B.Sc. Computer Science, University of Cape Coast — 2020 (GPA 3.54)

Microsoft Certified: Azure Fundamentals (AZ-900) — 2023

Google IT Support Professional Certificate — 2021

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Google IT Support Professional Certificate
- Global Code Summer Program (U.K.)

SOFT SKILLS

Collaboration • Initiative • Leadership • Communication • Analytical Thinking
